

Safety Data Sheet

SECTION 1: IDENTIFICATION OF THE SUBSTANCE AND SUPPLIER

Product Name:	Formula Five
Product Code:	UBPX005000
Recommended Use:	Trace element supplementation for cattle, sheep and goats.
New Zealand Manufacturer/Distributor: Address:	Unitech Industries Head Office 38-44 Bruce McLaren Road Henderson, Waitakere 0612 Auckland
Telephone Number:	+64 9 835 0835
24 Hour Emergency Contact (NZ Only): Emergency Contact (Worldwide):	0800 CHEMCALL (0800 243 622) +64 3 353 0199
Email:	Sales@unitech.co.nz
Website:	www.unitech.co.nz

SECTION 2: HAZARD IDENTIFICATION

Statement of Hazardous Nature:	Classified as hazardous according to the criteria in the Hazardous Substances (Minimum Degrees of Hazard) Regulations 2001.
HSNO Classifications:	6.1D (Oral), 6.1E (Inhalation), 6.3A, 6.4A, 6.9B, 9.1B, 9.2C, 9.3C
Signal Word:	Warning
Hazard Statements:	H302 – Harmful if swallowed H333 – May be harmful if inhaled H315 – Causes skin irritation H319 – Causes serious eye irritation H371 – May cause damage to organs H411 – Toxic to aquatic life with long lasting effects H423 – Harmful to the soil environment H433 – Harmful to terrestrial vertebrates
Precautionary Statements:	Response: P102 – Keep out of reach of children P103 – Read label before use P104 – Read Safety Data Sheet before use P202 – Do not handle until all safety precautions have been read and understood P260 – Do not breathe dust P264 – Wash contaminated areas of body thoroughly after handling P270 – Do not eat, drink or smoke while using this product P271 – Use only outdoors or in a well-ventilated area P273 – Avoid release into the environment P280 – Wear protective gloves and clothing P281 – Use personal protective equipment as required

Response:

P101 – If medical advice is needed, have product container or label at hand
 P312 – Call a poison centre or doctor if you feel unwell
 P321 – Specific treatment see section four of this document
 P362 – Take off contaminated clothing and wash before re-use
 P391 – Collect spillage
 P301+P312 – IF SWALLOWED: Call a poison centre or doctor if you feel unwell
 P330 – Rinse mouth
 P331 – Do NOT induce vomiting
 P304 + P340 – If inhaled: Remove to fresh air and keep at rest in a position comfortable for breathing
 P302+P352 – IF ON SKIN: Wash with plenty of soap and water
 P332+P313 – If skin irritation occurs: Get medical advice
 P305+P351+P338 – IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.
 P337+P313 – If eye irritation persists: Get medical advice

Storage:

P405 – Store locked up

Disposal:

Refer to section 13 of this document or the product label for disposal instructions.

SECTION 3: COMPOSITION/INFORMATION ON INGREDIENTS

Substance Name	CAS Number	Concentration Range
Copper Chelate	HSR003697	> 50.0%
Cobalt Chelate	HSR002571	10.0 – 20.0%
Zinc Chelate	HSR002571	5.0 – 10.0%
Sodium Selenate	13410-01-0	1.0 – 5.0%
Ethylenediamine Dihydroiodide	5700-49-2	0.1 – 1.0%
Non-hazardous substances		10.0 – 20.0%

SECTION 4: FIRST AID MEASURES

SYMPTOMS

Eye Contact:

Chemically this product causes serious irritation to the eye and due to its physical form mechanical irritation is also possible.

Skin Contact:

Skin contact cause skin irritation and an allergic skin reaction in some people.

Inhalation:

This product may be harmful if inhaled, although specific symptoms are unknown. Possible symptoms include dizziness, nausea, confusion and vomiting. Long term exposure to vapours or significant short term exposure may progress to respiratory diseases. Product may damage lungs.

Ingestion: This product is considered to be toxic through ingestion, although specific symptoms are unknown. Possible symptoms include stomach pains, vomiting, nausea and general discomfort. Ingestion of this product may cause damage to internal organs.

TREATMENT

Eye Contact: Immediately and carefully rinse eyes out with water for at least ten minutes to remove product from the eye. If irritation persists or symptoms worsen seek medical advice.

Skin Contact: Wash exposed area thoroughly with soap and warm water to remove product residue. If a rash or pain develops seek medical advice.

Inhalation: Remove victim to fresh air and sit in a position comfortable for breathing. Monitor vital signs and if shortness of breath or unconsciousness occurs then call an ambulance immediately.

Ingestion: Wash mouth out to remove residual product and give plenty of water to drink. Do NOT induce vomiting. Seek medical advice immediately.

SECTION 5: FIRE FIGHTING MEASURES

Suitable extinguishing media: Water, foam, extinguishing powder, carbon dioxide.

Unsuitable extinguishing media: No unsuitable extinguishing media known.

Hazards from combustion products: Unknown.

Instructions/Precautions for fire fighters: Standard issue fire-fighting equipment should be worn at all times. Take all reasonable measures to contain water run-off and prevent it from entering drains, waterways and natural water reserves.

SECTION 6: ACCIDENTAL RELEASE MEASURES

Protective Clothing Requirements: When dealing with a spill wear appropriate protective equipment including safety glasses, gloves, and apron, and avoid unnecessary skin/body exposure.

Environmental Precautions: In the event of a spill efforts should be made to contain the product as soon as possible. Prevent product from entering drains or waterways. Product has been classified **9.1B – Toxic to aquatic life with long lasting effects, 9.2C – Harmful to the soil environment and 9.3C – Harmful to terrestrial vertebrates**. Appropriate authorities should be alerted immediately if product is accidentally released into the environment.

Method for Containing Spill: Clean up spill mechanically while wearing appropriate protective equipment to avoid exposure and place in container for disposal according to the New Zealand Hazardous Substances (Disposal) Regulations 2001 or other relevant local regulations.

Other Information: Observe basic hygiene standards when dealing with a spillage: do not eat, drink or smoke after coming into contact with product. Provide adequate ventilation.

SECTION 7: HANDLING AND STORAGE

Storage Instructions:	Product should be stored at ambient temperature. Exposure to direct sunlight and moisture should be avoided.
Handling Instructions:	Handle in a way that minimises risk of exposure. Always wear protective gloves, safety mask, protective clothing and safety glasses where there is a risk of accidental contact.

SECTION 8: EXPOSURE CONTROLS/PERSONAL PROTECTION

Exposure Limits:	No components of this product have an exposure limit set in the <i>Workplace Exposure Standards and Biological Exposure Indices</i> published by Ministry of Business, Innovation and Employment NZ.
Engineering Controls:	Provide an eyewash station and a safety shower.
Personal Protection:	Hand: Wear protective gloves made of butyl rubber, nitrile or latex. Eyes: Safety glasses/goggles should be worn to protect the eyes from both chemical and mechanical irritation. Skin and body: Wear protective clothing that minimises skin exposure and contamination of personal clothing. Respiratory: A respirator should be worn at all times to protect the oesophagus and lungs.

SECTION 9: PHYSICAL AND CHEMICAL PROPERTIES

Appearance:	Clear liquid
Odour:	Mineral metallic
pH:	Not applicable
Solubility:	Soluble in water

SECTION 10: STABILITY AND REACTIVITY

Stability of Product:	Stable under normal conditions of use.
Conditions to avoid:	Avoid extreme temperatures and exposure to light.
Incompatible Materials:	None known.
Hazardous Decomposition:	None known.

SECTION 11: TOXICOLOGICAL INFORMATION

Health effects:

Eyes:	Chemically this product causes serious irritation to the eye and due to its physical form mechanical irritation is also possible.
Skin:	Skin contact causes skin irritation and an allergic skin reaction in some people.

Inhalation: This product may be harmful if inhaled, although specific symptoms are unknown. Possible symptoms include dizziness, nausea, confusion and vomiting. Long term exposure to vapours or significant short term exposure may progress to respiratory diseases. Product may damage lungs.

Ingestion: This product is considered to be toxic through ingestion, although specific symptoms are unknown. Possible symptoms include stomach pains, vomiting, nausea and general discomfort. Ingestion of this product may cause damage to internal organs.

Toxicological Data: This product has been classified **6.1D (Oral) – Harmful if swallowed** and **6.1E (Inhalation) – May be harmful if inhaled**. This product is only known to be toxic through ingestion and inhalation but other symptoms are possible through alternative routes of exposure.

Calculated LD50: 1268.173 mg/kg (Oral)

SECTION 12: ECOLOGICAL INFORMATION

Eco-Toxicological Data: Product has been classified **9.1B – Toxic to aquatic life with long lasting effects, 9.2C – Harmful to the soil environment** and **9.3C – Harmful to terrestrial vertebrates**. For this reason it is important that the product be disposed of in an appropriate manner and not released into the environment in its current state.

No data available for this product.

SECTION 13: DISPOSAL CONSIDERATIONS

Disposal Instructions for Product: Product must be disposed of in accordance with the Hazardous Substances (Disposal) Regulations 2001 or other relevant local regulations. Product has been classified **9.1B – Toxic to aquatic life with long lasting effects, 9.2C – Harmful to the soil environment** and **9.3C – Harmful to terrestrial vertebrates** so should not be disposed of in waterways, sewers, drains or the like. Product must be sufficiently diluted if being disposed of by discharge into the environment so that the discharged product concentration no longer triggers any environmental hazards. Seek specific advice on components before disposing of by incineration.

Disposal Instructions for Packaging: Packaging should be washed and recycled if possible or thoroughly cleaned before being disposed of in accordance with the Hazardous Substances (Disposal) Regulations 2001 or other relevant local regulations.

SECTION 14: TRANSPORT INFORMATION

Domestic Transport: Classified as dangerous goods for transport under NZ Standard 5433:2007 Transport of Dangerous Goods on Land.

Air Transport: Classified as dangerous goods for transport under International Civil Aviation Organisation and International Air Transport Association regulations

Sea Transport: Classified as dangerous goods for transport under International Maritime Organisation regulations

Proper Shipping Name: ENVIRONMENTALLY HAZARDOUS SUBSTANCE, SOLID, N.O.S.
(Sodium Selenate)
UN Number: 3077
DG Class: 9
Packing group: III

SECTION 15: REGULATORY INFORMATION

ERMA Approval Number: HSR002521
Title of Group Standard Assigned: Animal Nutritional and Animal Care Products Group Standard 2006
Other Information: For specific advice on controls/conditions/regulations of the group standard beyond what is contained in this Safety Data Sheet refer to www.epa.govt.nz

SECTION 16: OTHER INFORMATION

Abbreviations:
STEL Short Term Exposure Limit
TWA Time Weighted Average
LD50 Lethal Dose 50%
LC50 Lethal Concentration 50%

Disclaimer: Based on composition information supplied by Unitech Industries Ltd. Information is based on current knowledge at the time of preparation which is thought to be accurate and correct. This document is not intended to imply a guarantee as to any specific properties of the product. When in any doubt about the safe use of a chemical always seek expert technical advice to guarantee health and safety of employees and equipment. Do not use product in conditions that contradict the advice given in this document.

Date Valid Until: 30/11/2019

Document History: Created 15/05/2014 10:49 a.m.
Amended 25/11/2014 1:43 p.m. due to product code change.
Amended 20/01/2015 1:12 p.m. due to product code change from UBPX001000 to UBPX005000.
